

Welcome and Opening Presentation

Why Regions? How Regional Innovation Clusters Can Foster the Next Economy

Dr. Isaac Addae
Alex Muggah

Case #1: Tues, 5 - 6pm

The New Cluster Moment: How Regional Innovation Clusters Can Foster the Next Economy

Mark Muro, Bruce Katz, Brookings Institute, September 2010

Agenda:

- *Cluster Theory (Alex, 15m)*
- *Clusters in Tennessee (Issac, 10m)*
- *Group Discussion (all, 25m)*
- *Questions, Reflections & Wrap up (all, 10m)*

Sources of Company Success

- Competitive advantage resides **inside a company**
- Competitive success depends primarily on **company choices**

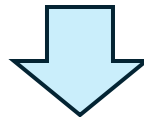

- Competitive advantage resides partly in the **locations** at which a company's business units are based
- **Cluster participation** is a major source contributor to company success

What is Competitiveness

A nation or region is competitive to the extent that firms operating there can **compete successfully** in the global economy while supporting **rising wages** and **living standards** for its citizens

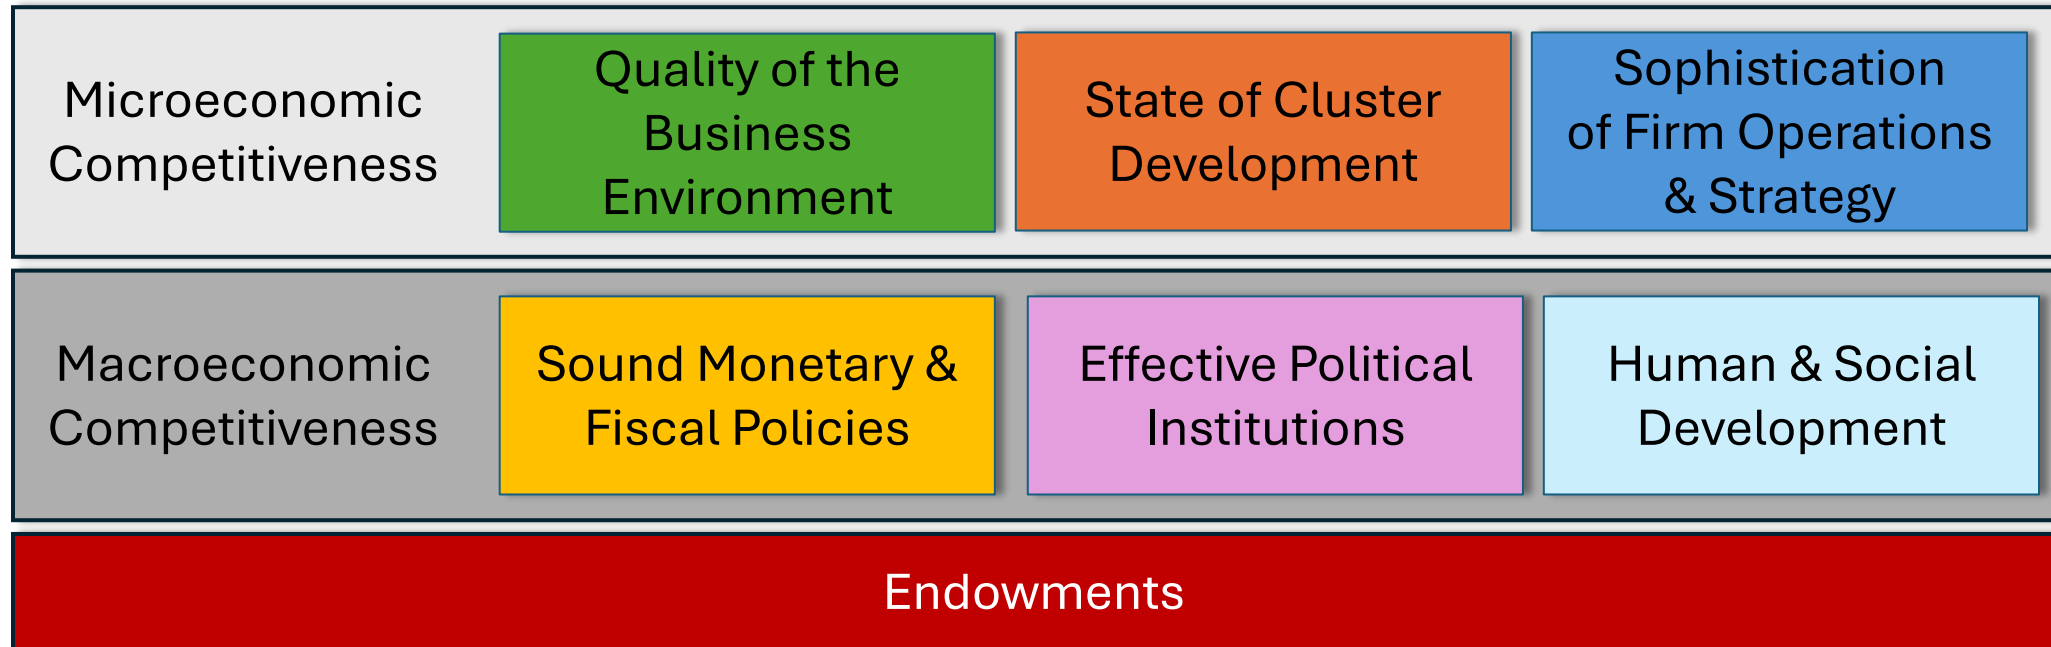

- Competitiveness depends on the **long-term productivity** with which a nation or region uses its human, capital, and natural resources
 - Productivity enables **sustainable wages, job growth, and standard of living**
 - It is not **what** industries a nation or region competes in that matters for prosperity, but **how productively** it competes in those industries
 - Productivity in a national or regional economy benefits from a combination of **domestic and foreign firms**

- Nations and regions compete to offer a more **productive environment for business**
- Competitiveness is **not a zero-sum game**

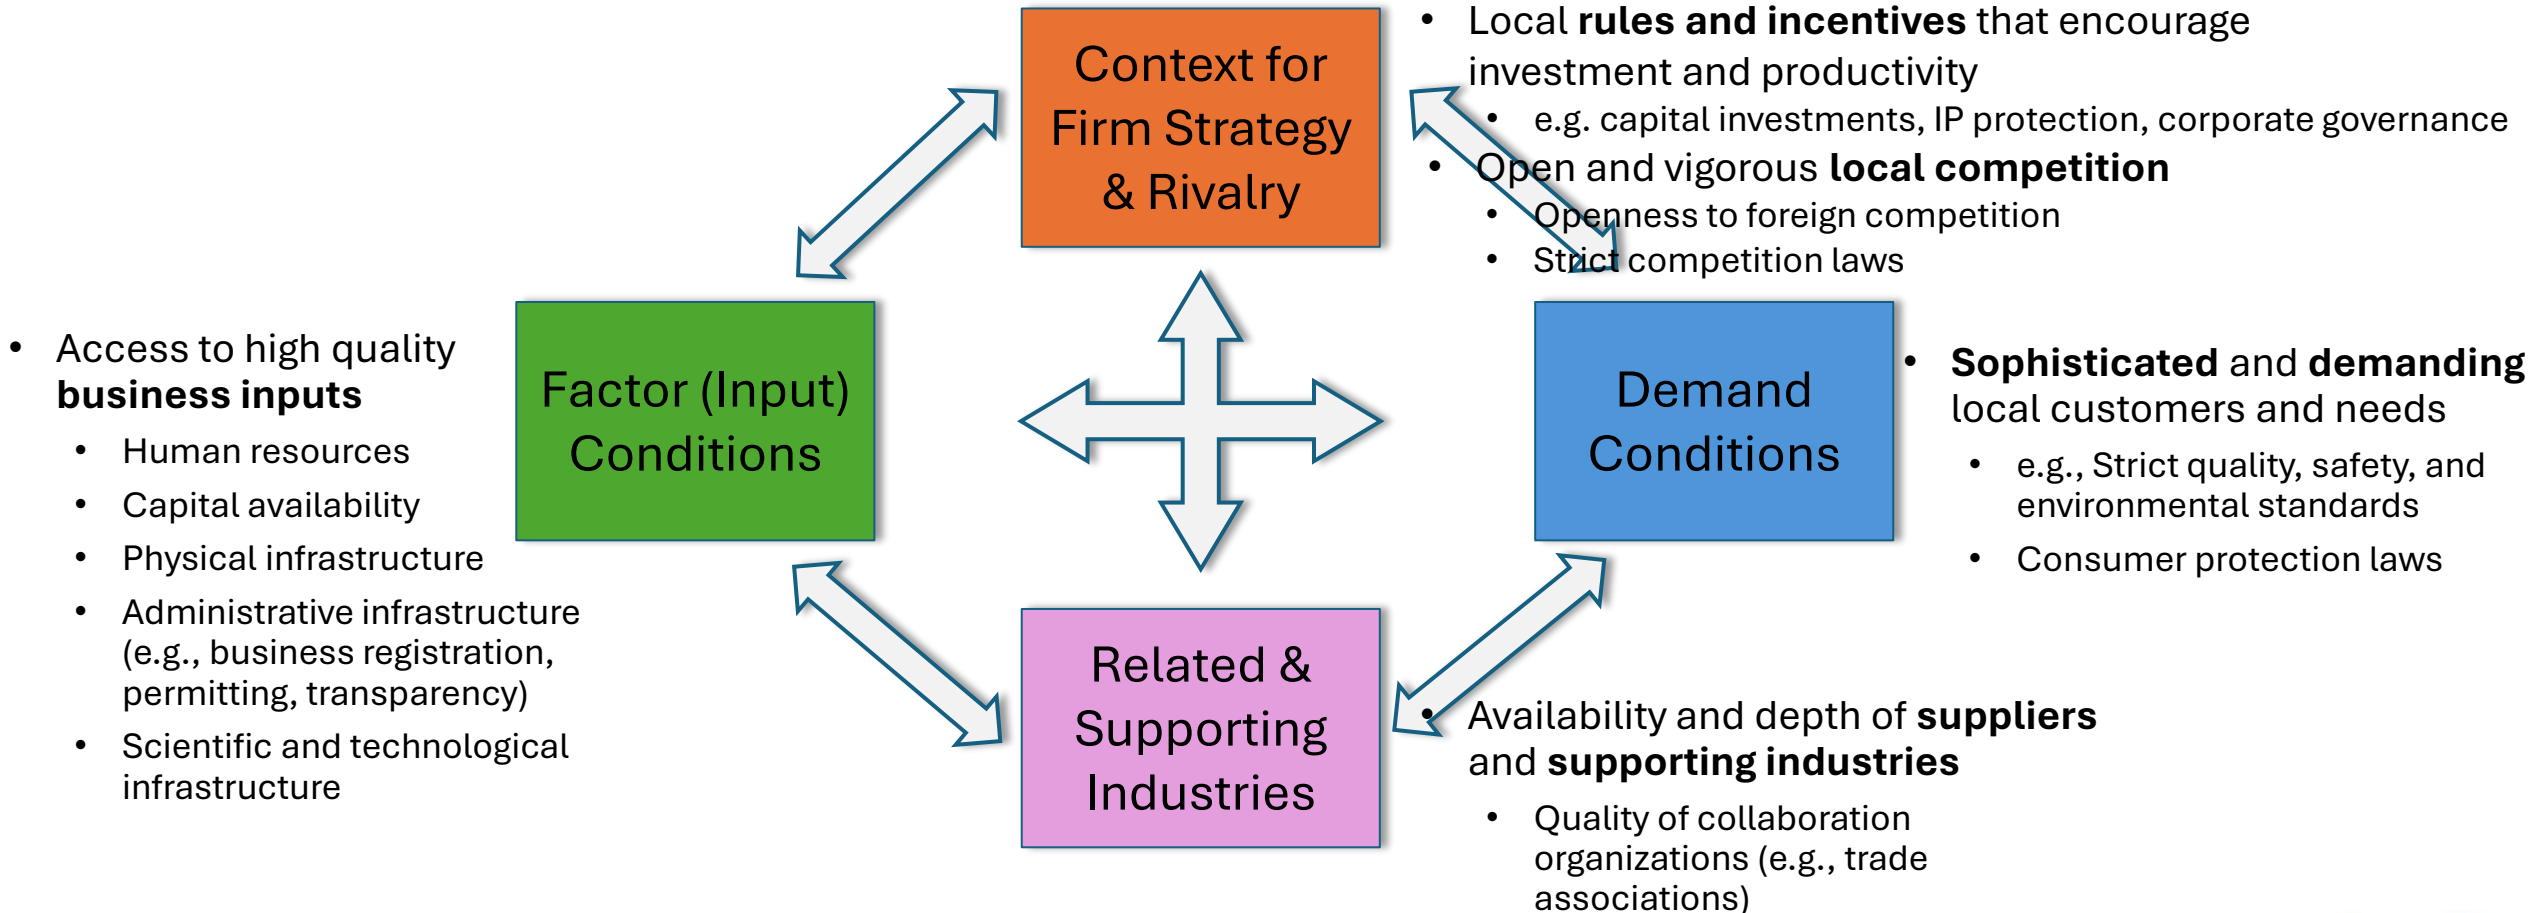

Determinates of Competitiveness

- Productivity ultimately depends on improving the **microeconomic capability** of the economy and the **sophistication of local competition**
- Macroeconomic competitiveness sets the **potential** for high productivity, but is **not sufficient**
- Endowments create a **foundation** for prosperity, but true prosperity is created by **productively using those endowments**

Quality of the Business Environment

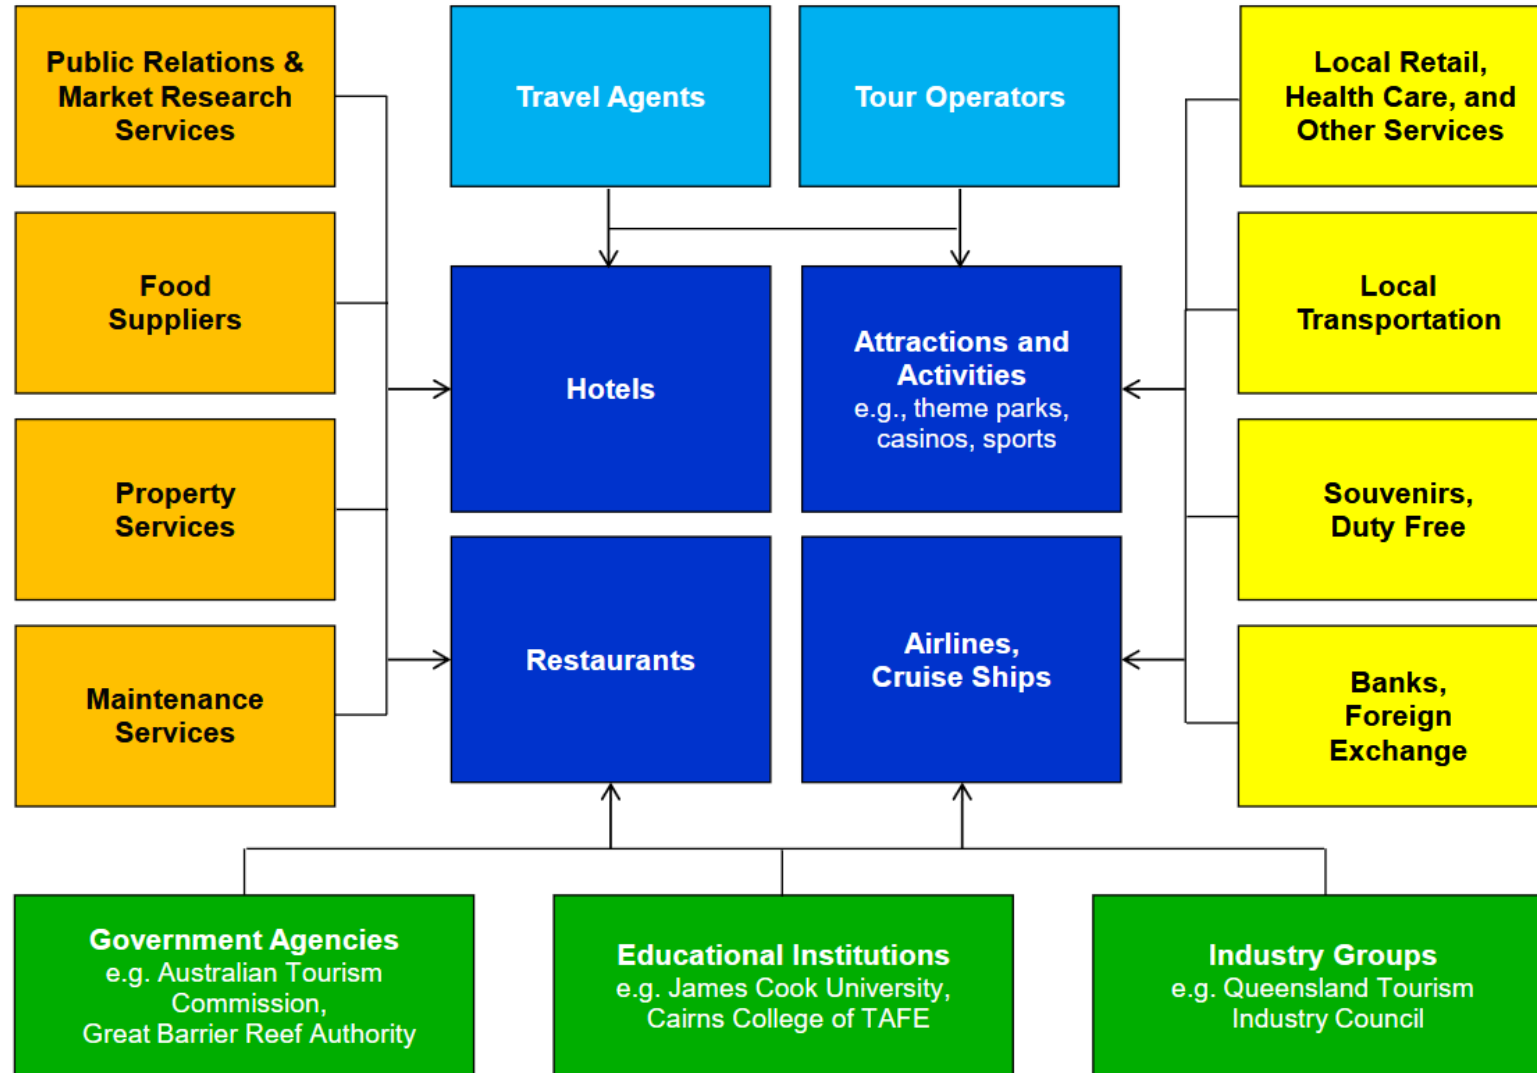

- **Many things matter** for competitiveness
- Successful economic development is a process of **successive upgrading**, improving business environment to enable increasingly sophisticated competition

Clusters and Economic Diversification

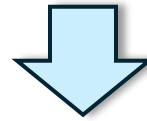

Note: Clusters with overlapping borders or identical shading have at least 20% overlap (by number of industries) in both directions.

Source: *Regional Competitiveness and the Role of Business*, Michael Porter, Institute for Strategy and Competitiveness

Why Clusters Matter

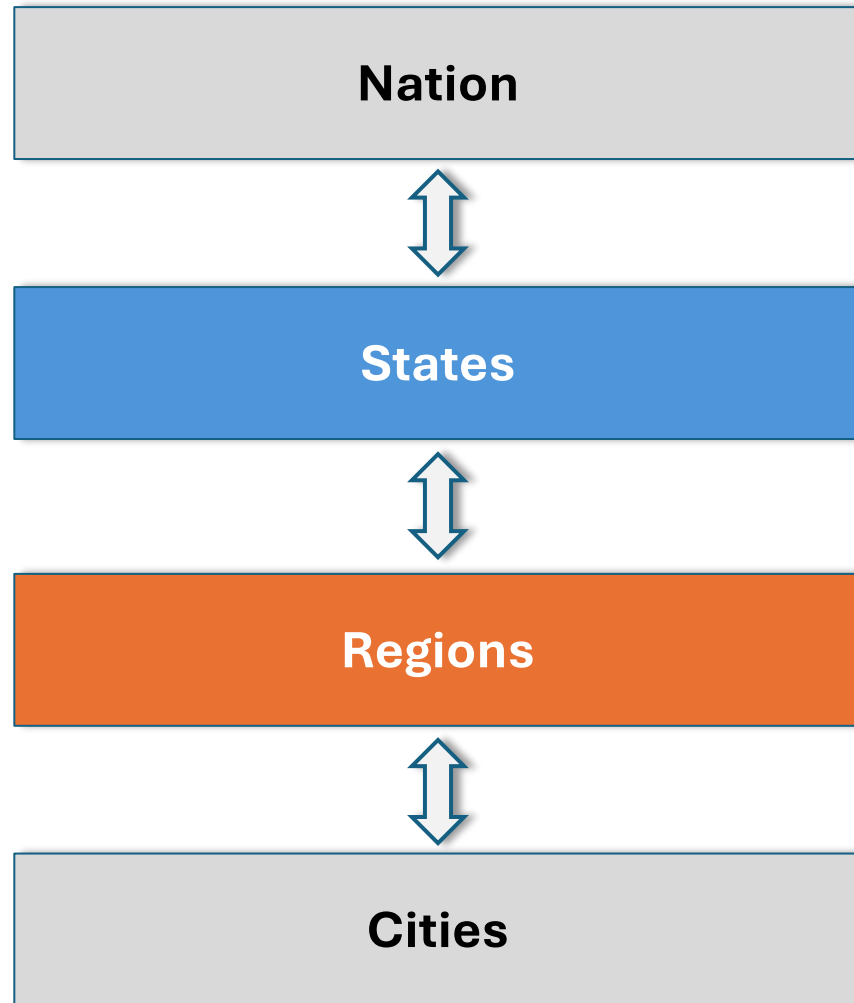

- Clusters increase **productivity, operational efficiency, and regional economic performance**
- Clusters stimulate and enable **innovations**
- Cluster facilitate **resilience, commercialization, and new business formation**

- Clusters reflect the fundamental importance to productivity of **linkages and spill-overs** across firms and associated institutions within a geographic area
- Clusters have a powerful impact on the range of **strategic options** that are available to firms in a given location

Geographic Influences on Competitiveness

- States and regions are the **most important economic unit for competitiveness**, especially in larger countries

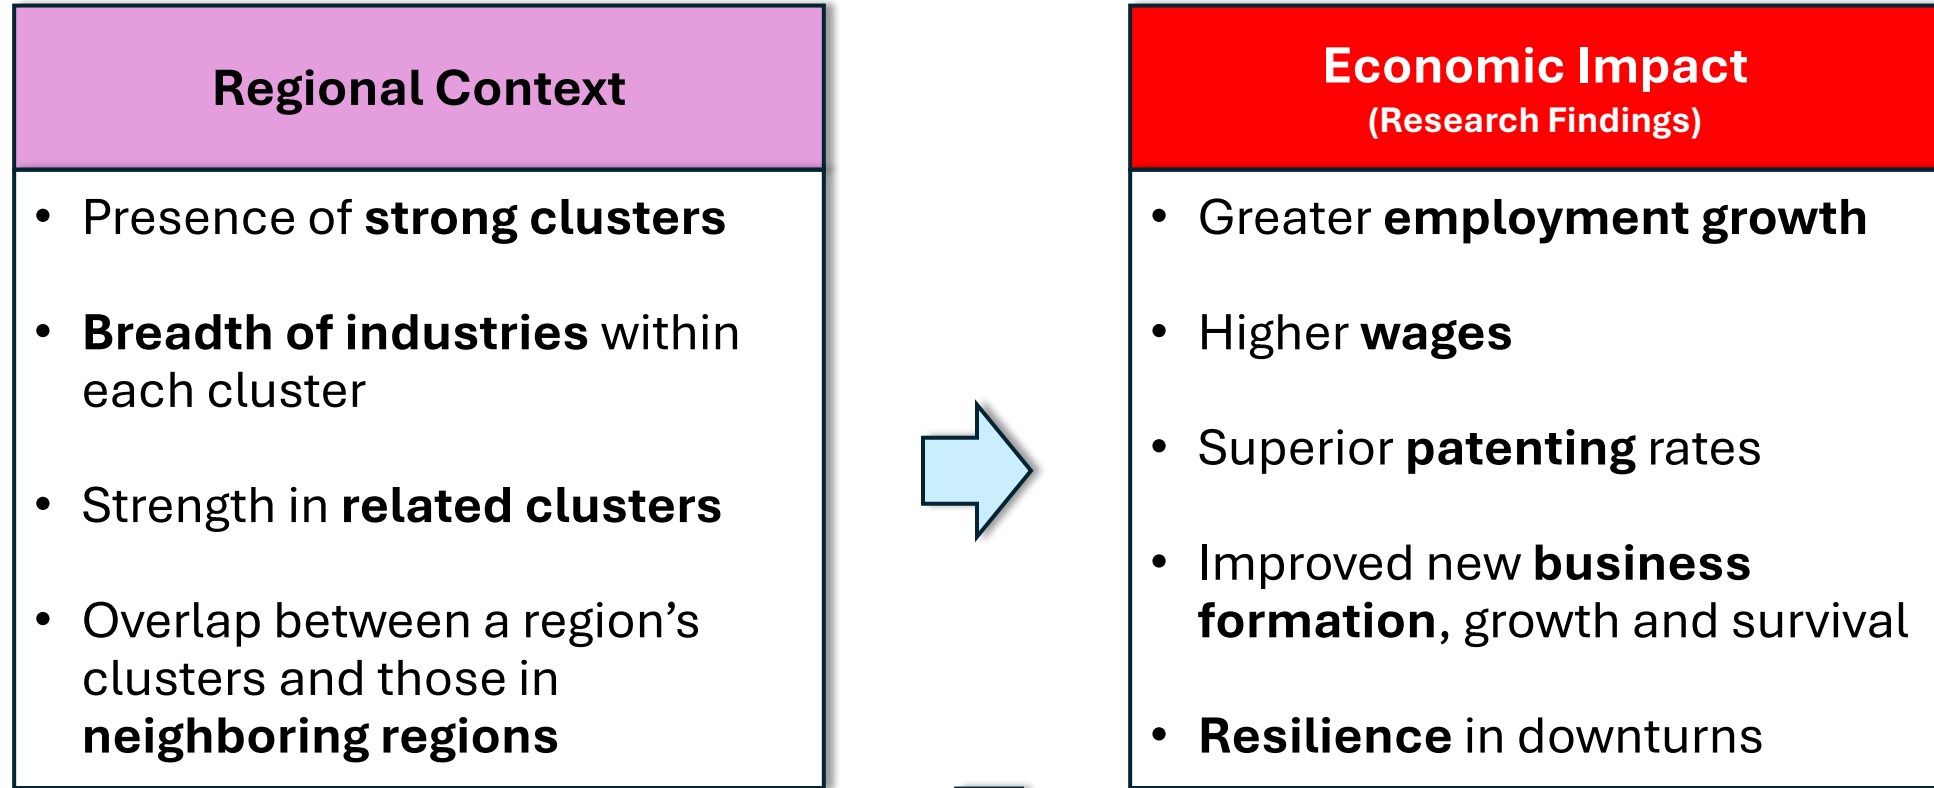

Regions & Competitiveness

- Economic performance **varies significantly** across sub-national regions (e.g., states, counties, metropolitan areas)
- Many essential levers of competitiveness reside at the **regional level**
- Regions **specialize** in different sets of clusters (local vs. traded)
- **Cluster strength** directly impacts regional performance
- Each region needs its own **distinctive competitiveness strategy** and **action agenda**
 - Business environment improvement
 - Cluster upgrading

Clusters Drive Regional Performance

- Build on **existing** and **emerging** clusters rather chasing fleeting trends
- Diversification occurs primarily **within clusters** and **across related clusters**

Creating Regional Strategy

Regional Value Proposition

- What is the **distinctive competitive position** of a geographic area given its location, legacy, existing strengths, and potential strengths?
 - What unique strengths as a business location?
 - For what types of activities and clusters?
 - And what roles with the surrounding regions, nation, and the broader world

Developing Unique Strengths

- What **business environment elements** can be unique strengths relative to peers / neighbors?
- What **existing** and **emerging clusters** can be built upon?

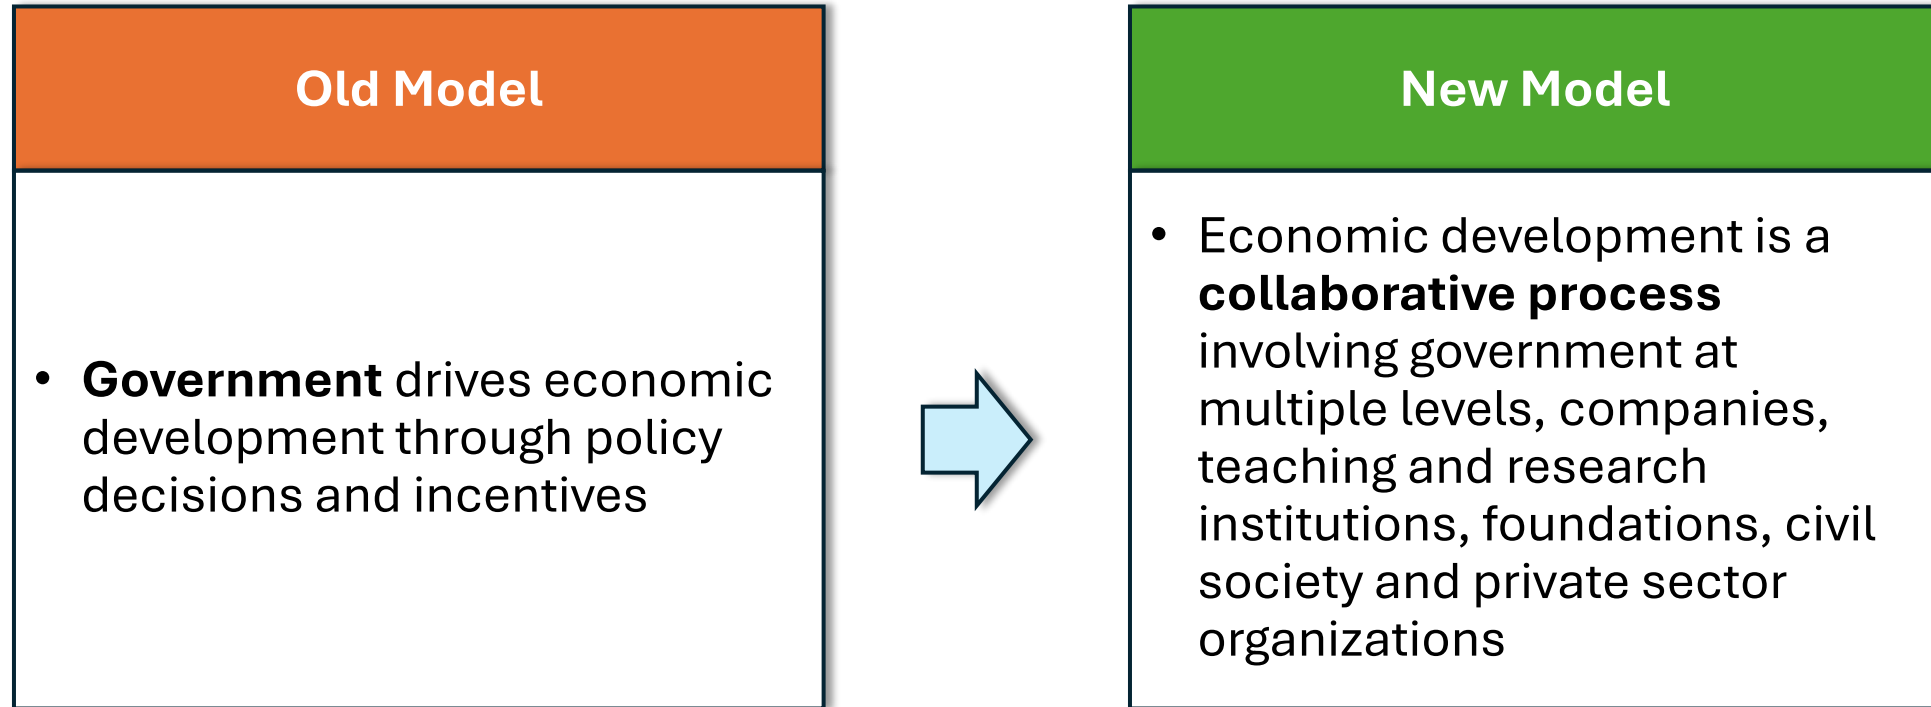

Achieving and Maintaining Parity with Peers

- What **weaknesses** must be addressed to remove key constraints and achieve parity with peer locations?

Priorities and sequencing are necessity in economic development

Harnessing a Collaborative Model

- Competitiveness results from both **top-down** and **bottom-up processes** in which many companies and institutions take responsibility

West TN – Logistics & Distribution

Anchor: FedEx, Memphis — bet placed 1971–73

Internal

External

- **The hub-spoke model itself** — strategic invention, not a geographic gift
- Continuous, multi-decade **infrastructure investment** (the FedEx SuperHub)
- University of Memphis **FedEx Institute of Technology** as a dedicated talent pipeline

- Near the **geographic center of the continental U.S.**, within a day's drive of a large share of the population
- **Convergence of five Class I railroads** — one of only four U.S. cities where this happens
- Mississippi River port access; reliable night-flying weather

West TN – Cluster Impact

- **Anchor:** FedEx World “SuperHub” — 880 acres, 180+ flights/day, ~484,000 packages/hour sorting capacity
- **Compounding infrastructure:** 5 Class I railroads, 700+ trucking companies, the 4th-largest inland port
- **Co-located giants:** FedEx, AutoZone, and International Paper are all Fortune 500 HQs built around the same logistics backbone (*\$130B+ combined global revenue in 2025*)
- **What’s next:** In 2025, LifeScience Logistics opened a 625,000 sq. ft. cold-chain facility for pharma and medical-device distribution

~\$50B

regional impact from air cargo alone

40,000+

direct and indirect jobs

#1

Fortune 500 company in Tennessee

Middle TN – Healthcare Services

Anchor: HCA, Nashville — bet placed 1968

- A genuine **management innovation** — hospital operations run as a scalable business
 - **Vanderbilt's** academic and clinical base supplying talent and research
 - The HCA “**spin-out**” effect — alumni who left to found competitor and adjacent companies
 - The **Nashville Health Care Council** (founded 1995) as a standing coordinating institution
- **Minimal.** Central U.S. location helps modestly, but this cluster was not built on geography or natural endowment
 - No coastline, no port, no unique natural resource drove this industry here

Middle TN – Cluster Impact

- **Anchor and spin-outs:** HCA alumni and divisions seeded a generation of competitor and adjacent companies (750+ spinouts)
- **17** publicly traded healthcare companies headquartered in the region (*\$97B+ combined global revenue in 2025*)
- **900+** specialized professional services firms (legal, accounting, consulting, real estate)
- **Academic anchors:** Vanderbilt University Medical Center, Meharry Medical College; convened by the Nashville Health Care Council

\$72.1B

Annual economic impact (2025)

372,160

jobs supported regionally

\$1.6B

venture capital invested over the past decade

East TN – Automotive Manufacturing

Anchor: Volkswagen, Chattanooga — bet placed 2008

- Coordinated **site-readiness and incentive strategy** from state and local leadership
- **VW Academy** — a purpose-built workforce pipeline with Chattanooga State Community College
- No state income tax, favorable cost and regulatory climate

- Sits in the **southern automotive corridor** with interstate (I-75/I-24) and rail access already in place
- A large, already-**remediated brownfield site** ready to build on

East TN – Cluster Impact

- **Anchor:** VW plant — Passat (2011) → Atlas SUV (2017) → all-electric ID.4 (2022)
- **Supplier park:** 7 suppliers built inside VW's own complex, 4 more next door — \$275M invested, ~1,100 jobs
- **Talent pipeline:** VW Academy with Chattanooga State Community College
- **Adjacent tech layer:** Chattanooga Quantum Collaborative builds on the same manufacturing and engineering base

12,400+

direct and indirect jobs

\$643M

annual Tennessee income generated

\$53.5M

additional state and local tax revenue

Group Discussion & Readout (25m)

Discussion Questions:

- What are the 3 most important clusters in your region? (may have more than 3)
- How do clusters in your region interact?
- What gaps / constraints do your clusters face?
- Who are the key stakeholders / anchor institutions activating your cluster?

Readout Question:

- What is a unique competitive advantage and/or cluster in your region?
- What did you discover in your discussion?

“None of us is as smart as all of us.”

— *Don Carew & Eunice Parisi-Carew
(& sometimes Ken Blanchard)*

One takeaway from the case

“Don’t try to create clusters out of nothing...”

Reflection Questions – Dinner

- What drives you to be engaged in your region?
- What do you most want to learn from the Academy?
- What are the key opportunities and challenges of your region?
- How do you think you can contribute to the learning experience of others at the Academy?
- If you could change one thing in your region to drive prosperity, what would it be?

Classes Rooms

- Zone 2 – Room 110
- Zone 3 – Room 219
- Zone 4 – Breakout Room 9 (in library on 2nd floor)
- Zone 5 – Room 125
- Zone 6 – Breakout Room 12 (in library on 2nd floor)
- Zone 7 – Room 213
- Zone 8 – Breakout Room 7 (in library on 2nd floor)

Class Agenda

- Introduction to Alex (5m) – first class only
- Structure of Each Class (5m) – first class only
- Making Class Personal (5m, close conversation)
- Case Overview (10m, together)
- Question 1 (10m, 5m close + 5m together)
- Question 2 (10m, 5m close + 5m together)
- Question 3 (10m, 5m close + 5m together)
- Additional questions (10m together)
- Application to your Region (15m)

Loading...

About Alex

- Canadian (family from Nova Scotia)
- Director of Synapse Consortium, regional life science cluster organization in Ontario with +50k employees
- Research Associate at Harvard Institute for Strategy & Competitiveness (founded by Prof. Porter)
- 9 days ago, my family adopted *Toby*, a golden retriever

Class Structure

- Making Case Personal
- Case Overview
- Case Questions
- Implications for your Region
- Wrap up

We'll have ~1h 15m per class

Cases We Will Cover

- *The California Wine Cluster* – June 24 (Wed), 10:15 – 11:45a
- *Electronics & IT in Costa Rica* – June 24 (Wed), 1:15 – 2:30p
- *Empower Upper Cumberland* – June 24 (Wed), 2:45 – 4:00p
- Transforming a Region: Gothenburg – June 25 (Thur), 9:00 – 10:15a
- Prosperity Fountains & Drains – June 25 (Thur), 10:30 – 11:45a
- Mobilization in Mitteldeutschland – June 25 (Thur), 2:00 – 3:15p
- Naranya: Created in Mexico – June 26 (Fri), 9:00 – 10:15a

My Goal; Support Your Goal(s)

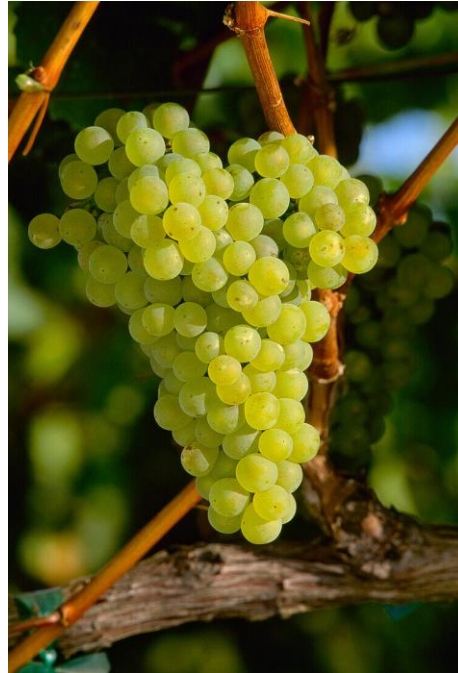

- *Exploration of case themes and implications, rather than facts*
- *Make the cases relevant to your region*
- *Activate all voices in room; keep conversation moving*
- *Inform, empower, and inspire, your regional action planning efforts*

Case #2: Wed, 10:15 - 11:45am

The California Wine Cluster

Porter & Bond, Harvard Business School, February 2013

Making the Class Personal

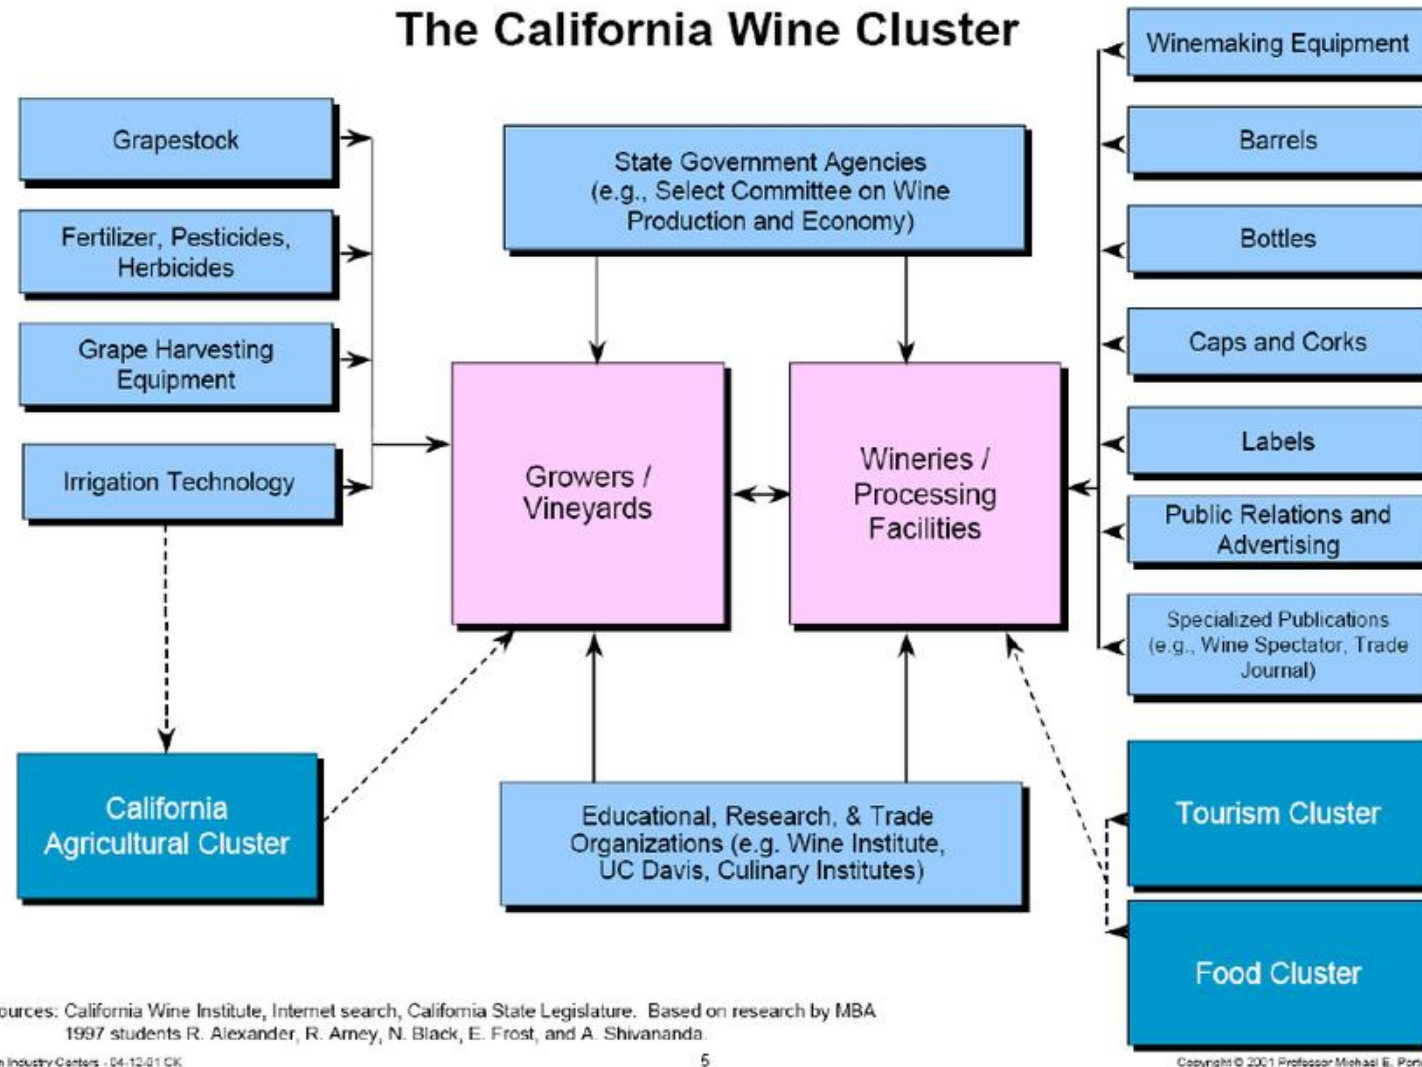

Break into groups of 3, and take a 5 minutes to discuss the following question:

“What motivated you to join the PDI Fellows Academy?”

“What do you hope to contribute while you’re here?”

California Wine Cluster Map

Case Overview: California Wine Cluster

- Cluster developed over time, informed by natural endowments and business environment
- Role of anchors (10 wineries account for 80% production) vs. smaller wineries (740 wineries, 4,000 growers);
- Product quality: premium vs. “jug” wine
- Technology and process improvements provide boost to productivity and quality (grafting, vineyard layout, irrigation)
- Industry associations (Wine Institute, Wine Market Council) convened to market cluster, advocate, and propagate industry best-practices
- Positive feedback of interacting with other clusters (i.e., tourism, agriculture, food processing)

Breakout Discussion Questions

- What are the key components of the wine cluster?
- Which is more competitive — an agriculture business or deep tech — and why?
- Are rural areas intrinsically poor? How can clusters affect rural poverty and prosperity?
- As a regional leader, what lessons could you learn from the California wine cluster that might have positive benefits for your region?

Additional Discussion Questions

- How did evolving product quality (i.e., US and Australia) impact cluster growth?
 - How does this drive investment and innovation?
- How does regional / country variations shape how clusters grow?
- How do exogenous shocks (i.e., phylloxera) encourage innovation?
- What does it mean to be an expensive place to do business?
- How did government intervention, regulation and data influence cluster development?

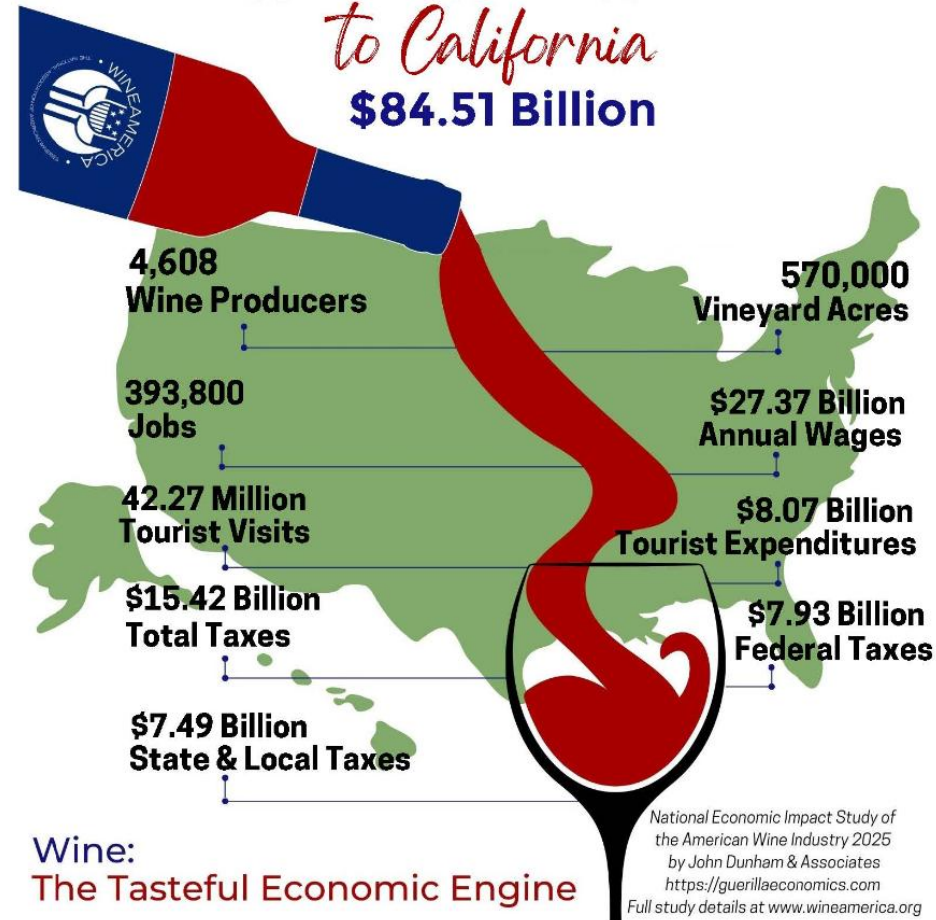

Wine Cluster Impact (2025)

WINEAMERICA, THE NATIONAL ASSOCIATION OF AMERICAN WINERIES

*What's Wine Worth
to California*
\$84.51 Billion

Source: Economic Impact Study, National Association of American Wineries, 2025

“Great things are done by a series of
small things brought together.”

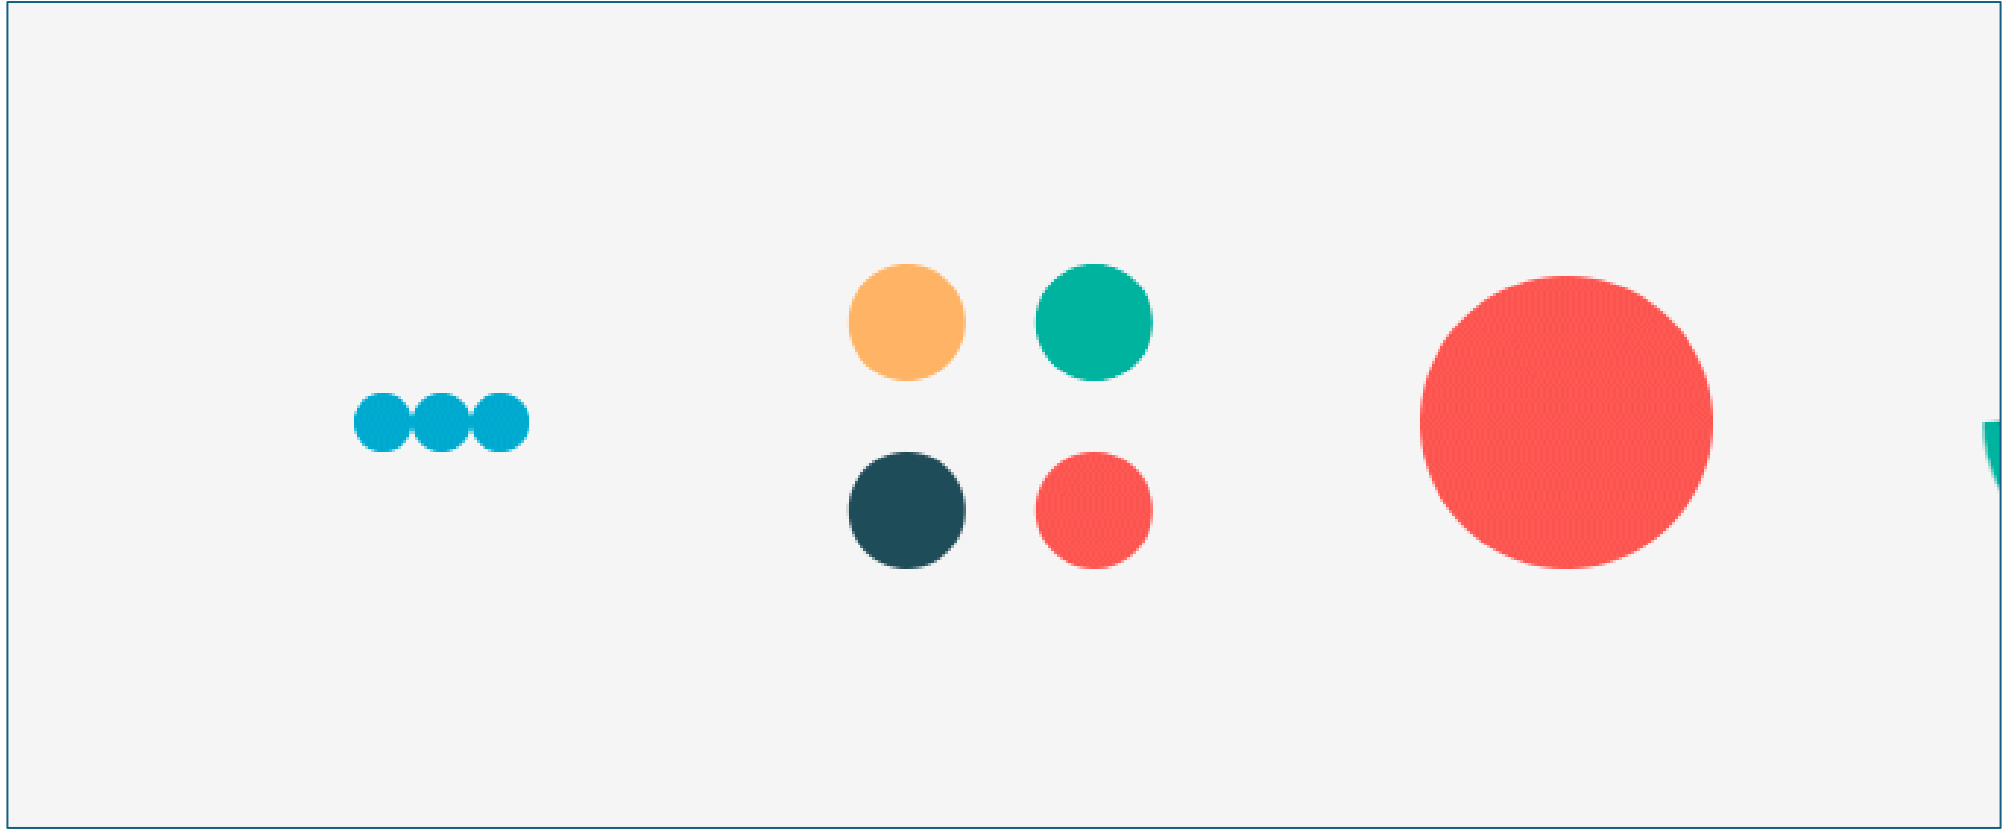

— Vincent van Gogh

One takeaway from the case

“Productivity (innovation) acts as a primary
catalyst for cluster growth...”

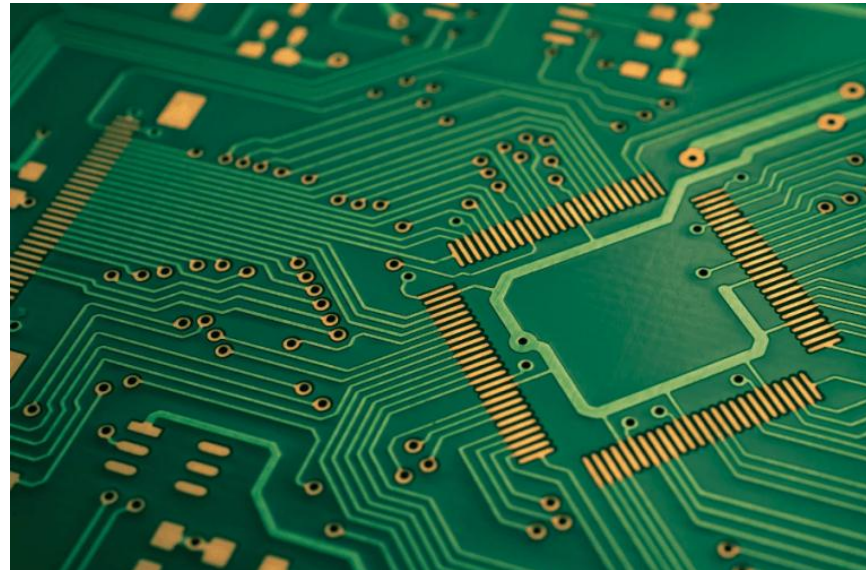

Loading...

Case #3: Wed, 1:15 - 2:30pm

Building a Cluster: Electronics and Information Technology in Costa Rica

Ketelhöhn & Porter, Harvard Business School, September 2013

Making the Class Personal

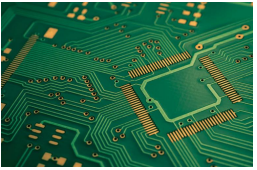

Break into groups of 3, and take a 5 minutes to discuss the following question:

“What are some of changes you will make to build a sustainable cluster in your region?”

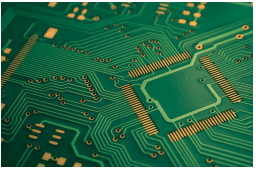

Case Overview

- Costa Rica – politically stable, legal system, minimum investments in education (6%), health (7%), and government R&D (1.1%)
- New economic strategy from President Figueres focused on productivity, efficiency and technology; data-driven analysis identified tourism cluster; revealed IT as new cluster opportunity
- Intel “long list” based on spreading geographic risk; whole of Costa Rica government pursuit of \$300M facility with 15 site visits
 - Cost structure vs. operating environment
 - Business environment (taxes), talent, air freight infrastructure, clean energy production
- Aspiration to integrate attraction of MNEs into national strategy; apply Intel approach/policies to all investors

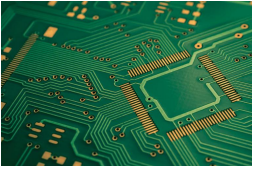

Breakout Discussion Questions

- What conditions led Costa Rica to pursue an innovation hub cluster strategy in electronics and IT?
- What deficits and obstacles did they need to address? Who played the lead and supporting roles?
- How would you assess their success in building the cluster?
- What strategies from this case could you use to build a competitive cluster in your region?
 - Where would you start?
 - What deficits and obstacles would you face?
 - Who needs to be at the table to build your cluster?

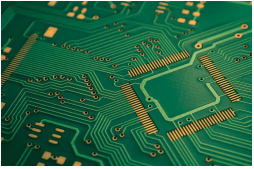

Additional Discussion Questions

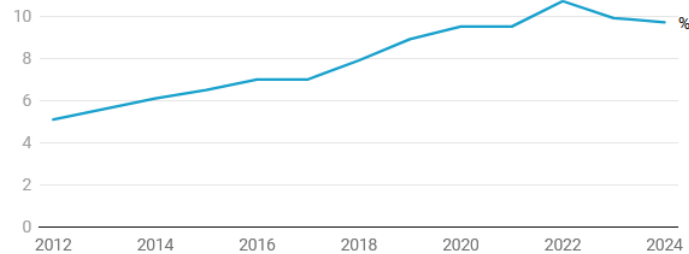

- What impact did Costa Rica's decision to compete globally have on its development?
- Why did President Figueres want to “move beyond cheap labour and exploiting natural resources” as an economic strategy?
- How do Intel's evaluation categories inform evaluating Tennessee's regional strengths?
- How could/should Costa Rica update its foundational economic strategy following success of a single FDI pursuit?

Costa Rica IT Cluster Today

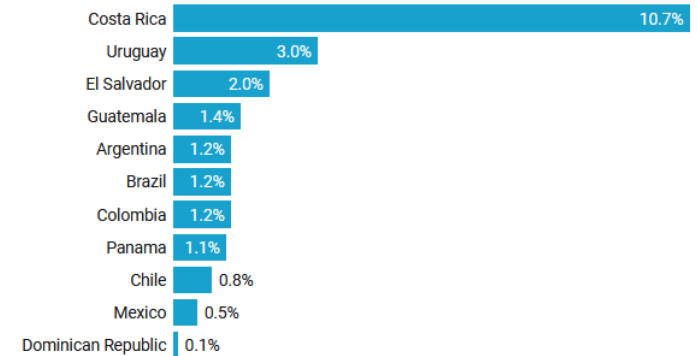

ICT Exports

Costa Rica's Next Cluster...

WHY COSTA RICA

A natural hub for
**life-centered
solutions**

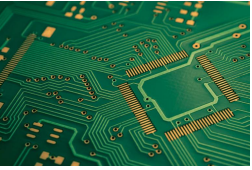

Find the sweet spot to drive your **sustainable
productivity**

[+ LEARN MORE](#)

Let's grow **smarter.**

“It always seems impossible until it's done.”

— Nelson Mandela

One takeaway from the case

“An attractive operating environment / infrastructure
can change the investment calculus for business ...”

Brief Brake (2:50-3:05)

What can you do in 15 minutes?

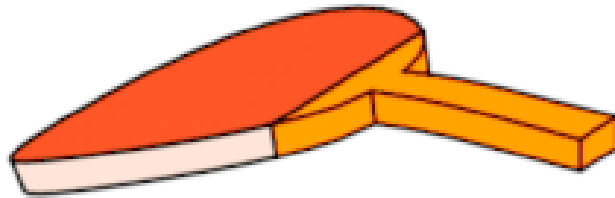

- Take a bio break
- Stretch
- Grab a snack
- Introduce yourself to someone new
- Meditate
- Write the first line of your memoir
(about how you improved your community)

Please return on time so we start our next case discussion

Loading...

Case #4: Wed, 1:15 - 2:30pm

Empower Upper Cumberland: Microeconomic Solutions for Poverty in Rural Areas

Scott Massey, Mark Farley, Richard Taylor, Global Action Platform, 2026

Making the Class Personal

Break into groups of 3, and take a 5 minutes to discuss the following question:

“How might you initiate collaboration between institutions / sectors across your community?”

Case Overview

- Leveraging \$25M Tennessee Opportunity Pilot Grant, reframing – and addressing – poverty as regional competitiveness issue
- Education and training pathways aligned to Upper Cumberland employer needs — healthcare, manufacturing, and skilled trades.
- Coordinated governance structure activated and engaged +25 stakeholders using shared data platform
- Scaling success requires decision to focus on depth vs. breadth

Breakout Discussion Questions

- What are the major competitiveness challenges in the Upper Cumberland (UC) region? How do these differ from urban or industrial contexts?
- How does Empower UC use clusters and collective impact to address poverty?
- What role does technology, data integration and quantitative KPIs play in enabling systemic change?
- In what ways can the Empower UC model be replicated in other rural regions? What contextual adjustments might be necessary?

Additional Discussion Questions

- Should Empower UC scale to all 14 counties now, or focus on deepening results in one? What trade-offs exist?
- How can Empower UC secure sustainable funding beyond the pilot grant?

Empower UC Today

- \$6.6M net annual income growth
 - 441 of 756 families earning more
- 113 moved to employment
 - Employment rate: 67% → 78%

Source: *Empower Upper Cumberland* website, accessed June 2026

“Our greatest weakness lies in giving up. The most certain way to succeed is always to try just one more time.”

— Thomas Edison

One takeaway from the case

“Investing in human capital propels corporate competitiveness – and thus, regional prosperity...”

Loading...

Case #5: Thur, 9:00 - 10:15am

Transforming a Region: Gothenburg's path from Shipyards to E-mobility

Ketels and Solvell, Harvard Business School, 2017

Making the Class Personal

Break into groups of 3, and take a 5 minutes to discuss the following question:

“How will the unique assets of your region (i.e., infrastructure, talent, history) influence your action planning strategy?”

Case Overview

- Gothenburg's economy and cluster portfolio evolved over time – trading hub (port), to industrial centre (textiles, shipyard) to advanced services (automotive, life sciences), connected to R&D infrastructure
- Experienced external shocks outside its control – collapse in shipyard demand, currency devaluation, & global financial crisis
- Regional-level policy tools are often too weak to overcome global trends, but can create/leverage opportunities and support periods of transition
- BRG emerged as SME-oriented investment attraction vehicle, then focused on collaboration, finally orchestrating and leading strategic initiatives

Breakout Discussion Questions

- Why did the Gothenburg region decide it needed to transform?
- How did the regional footprint of this development effort inform the strategy?
- How are leaders and cluster assets mobilized across a region?
- How did the shipyard cluster assets feed into the e-mobility cluster?
- Does your region need a similar cluster economic transformation? What lessons do you derive from this case that might help your region transform?

Additional Discussion Questions

- What role did Gothenburg's investments in R&D infrastructure capacity inform the shape of its cluster development?
- How did external shocks impact cluster transformation (i.e., China shock, global financial crisis, net-zero policy)
- How did the regional response differ from the shipyard crisis in the 1970s vs. automotive crisis in 2008?
- How has BRG evolution over time (i.e., structure, ambitions, activities) supported Gothenburg's economic prosperity?
- How can stakeholders evaluate the impact and contribution of BRG?

“If everyone is moving forward
together, then success
takes care of itself.”

— Henry Ford

One takeaway from the case

“Economic development agencies can act as a powerful tool
to strengthen the competitiveness of a region...”

Brief Brake (10:15-11:30)

What can you do in 15 minutes?

- Take a bio break
- Stretch
- Grab a snack
- Introduce yourself to someone new
- Meditate
- Write the last line of your memoir (about what you left undone)

Please return on time so we start our next case discussion

Loading...

Case #6: Thur, 10:30 - 11:45am

Prosperity Fountains & Prosperity Drains: Why Headquarters Matter
Global Action Platform, 2026

Making the Class Personal

Break into groups of 3, and take a 5 minutes to discuss the following question:

“What are three constraints you want to address to build prosperity (clusters) in your region?”

Case Overview

- Headquarters of traded, innovative-intensive firms can generate significant spillovers, but are hard to attract (
- Local companies grow slowly, but retain authority over setting strategy, and decisions related to capital investment, R&D, and manufacturing
- Home grown companies have vested interest in making strategic investment to boost competitiveness of region, as well as the broader community
- Opportunity costs of recruiting vs. investing in underlying regional competitiveness

Breakout Discussion Questions

- Who benefits most from a corporate recruitment — politicians, corporations, or local citizens and businesses?
- How would you assess the balance of growing competitive HQ companies in your region versus recruiting companies to move there?
- If you could, how would you [re]balance the investments?

Additional Discussion Questions

- What does it say about the competitiveness of a region, that we must ~~bribe~~ “incentivize” companies to establish a presence in our region?
- How does complexity and timelines of a “fountain strategy” impact its attractiveness? What conditions predicate success?
- In what circumstances might recruiting a satellite operations reinforce a regional economic cluster strategy?
- How do other non-economic (i.e., political, social) considerations impact strategic

Impact of TN Small Businesses (2025)

- 741,000 small businesses in TN (<500 employees), together employed 1.2M people (41.5% private workforce)
- Major driver of employment growth, contributing +40,433 net jobs (80.7% of the total increase)
- TN has an innovative business environment → it creates LOTS of companies.... But 29.3% fail in first year (2nd worst in US); over half close within five years; 72.7% failure rate after 10 years

“Do It! Do what you can, with what you have, where you are.”

— President Theodore Roosevelt

One takeaway from the case

“Opportunity costs of attracting companies: building R&D capacity, local SME growth, infrastructure, talent ...”

Loading...

Case #7: Thur, 2:00 - 3:15pm

Cluster Mobilization in Mittel Deutschland

Jeffrey Fear & Christian Ketels, Harvard Business School, 2007

Making the Class Personal

Break into groups of 3, and take a 5 minutes to discuss the following question:

“How will your leadership style influence how you engage and activate stakeholders in your region?”

“How might you modify your approach to facilitate greater collaboration?”

Case Overview

- At crossroads of Germany, since WWII, Mittel Deutschland economic development shaped by economic and political shocks.
- Integration placed demands at all levels of government – +€1 trillion invested – but securing productivity gains was painful and discomfoting (economically, socially, culturally)
- Anchor companies (Dow, BMW, VW) saw clear connection between company's growth and region's economic prosperity; crucially leaders did too, established RBG (amongst others)
- As RBG underwent evolution from marketing region to mobilizing clusters, continued gap between performance of broader ecosystem (20% unemployment, population outflows) and anchor companies
- Benefits of cluster initiatives are dispersed, and can be hard to measure; requiring leadership to sustain over time

Breakout Discussion Questions

- What key assets did this region use to mobilize regional clusters?
- What roles did these sectors play in cluster mobilization—the private sector, universities, and governments?
- How did the leaders build cross sector trust?
- How would you assess your region's cross-sector trust and collaborative capacity?
- How could you use this case to improve cross sector collaboration in your region?

Additional Discussion Questions

- How do you ensure value of creating one more network or initiative, when others might already exist?
- What influence did evolving language, from “regional marketing” to “cluster mobilization” have on RMGs ability to foster collaboration?
- How did Dow benefit from building social capital in the region (i.e., philanthropic activities around education)?
- What is the impact of variation in R&D spending by companies vs. government/universities (Exhibit 11)?

“A leader is best when people
barely know he exists...
when his work is done, his aim fulfilled,
they will say: we did it ourselves.

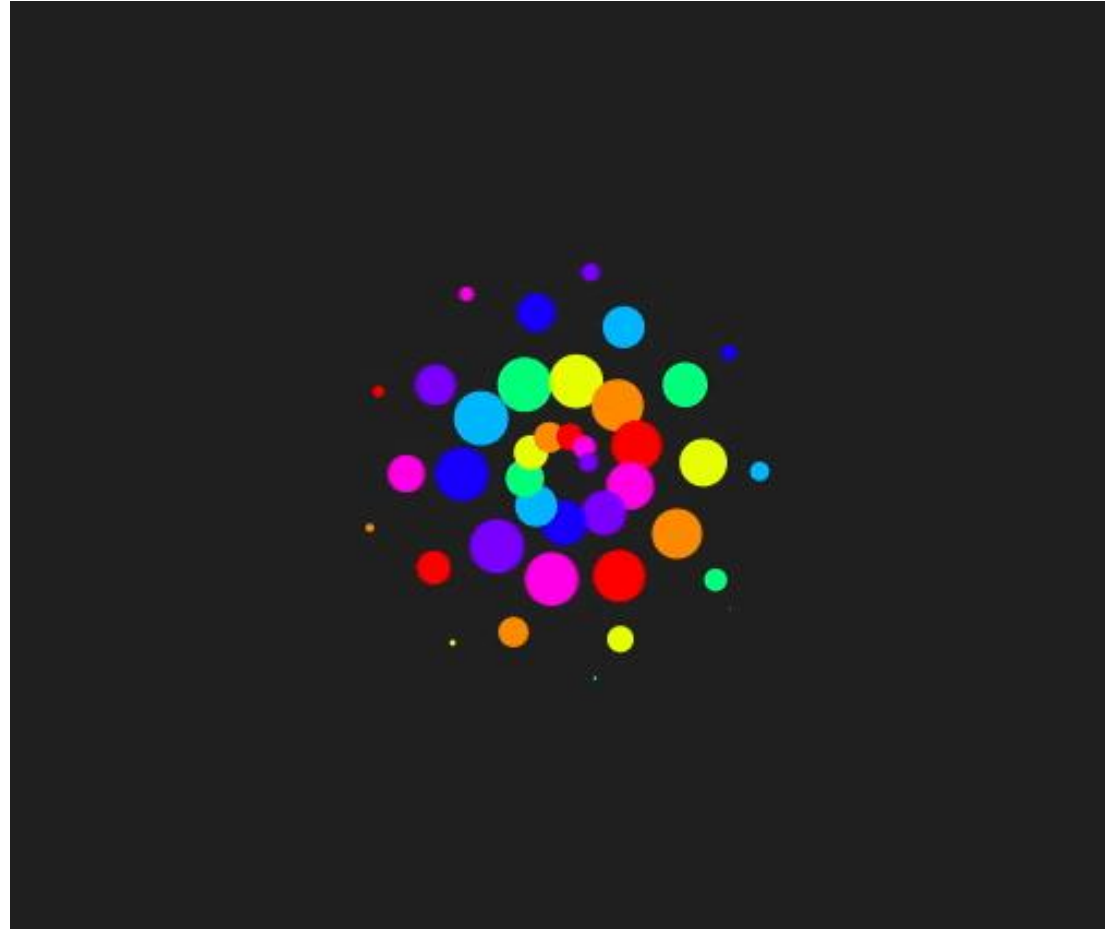

— Lao Tzu

One takeaway from the case

“Engagement of private sector leadership required
to catalyze regional initiatives ...”

Loading...

Case #8: Fri, 9:00 - 10:15am

Naranya: Created in Mexico

Alfaro, Ketels, Dominguez, Sheldahl-Thomason, Harvard Business School, 2016

Making the Class Personal

Break into groups of 3, and take a 5 minutes to discuss the following question:

“What makes you nervous about building an action plan for your region?”

“What are you most excited about?”

Breakout Discussion Questions

- Why does Mexico have two economies? What has shaped that?
- Does Tennessee have multiple economies? Does your region? Describe the differences you see.
- How did the presence of a globally competitive traded cluster HQ have on advancing the new economy in Mexico?
- How did a change in political leadership affect economic development?

Additional Discussion Questions

- Is there a globally competitive traded cluster HQ in your region? If so, how are they engaged in accelerating an advanced economy in your region? If not, how can you manage that deficit?
- Is your region being “colonized” by a rapidly growing urban center and modern economy nearby? If so, how can you mobilize your economic, education, regional collaboration, and quality of life assets to manage the detrimental impacts of such expansion?
- What kind of political leadership do you need to advance a modern economy in your region?
- How does ability for companies to “steal talent” impact attractiveness of a region?

“The best way to predict the future is to create it.”

— Alan Kay

One takeaway from the case

“Incentives for collaboration are more closely
aligned at the regional level...”

Wrap up Feedback

- What would you add to improve the program?
- What is one thing you would remove?
- What new insights are you taking back to your region?
- What helped you the most?
